EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. William A. Henry on 1/27/05.

3. The application has been amended as follows:

In the claims:

1. (Currently amended) An apparatus for producing a line of approximately 360° within a predetermined plane, comprising:

a laser source adapted to produce radiant energy;

a laser output altering device, and wherein radiant energy projected from said laser source into said laser output altering device emerges from said laser output altering device within said predetermined plane in an ever expanding circle of light; and

a plumb bob with said laser output altering device positioned between portions of said plumb bob; wherein said laser output altering device is in the form of a hollow tube within a hollow tube.

4-6. (Canceled)

Allowable Subject Matter

4. Claims 1-3, 7 are allowed.

Art Unit: 2873

5. The following is an examiner's statement of reasons for allowance: Regarding claim 1, prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the dependent claims, in such manner that a rejection under 35 U.S.C 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which at least include and apparatus for producing a line of approximately 360 degrees within a predetermined plan comprising a plumb bob wherein the light altering device is in the form of a hollow tube as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tacklind et al (US 6,542,304) discloses a laser beam device with apertured reflective element.
